

Amerox DEX – Institutional Token Sale Terms & Regulatory Notice

Legal Disclaimer & Regulatory Notice

Amerox is a decentralized, non-custodial protocol. AMX tokens are utility tokens designed for protocol governance and fee mechanics; they do not represent equity, debt, or any form of investment contract. Citizens of restricted jurisdictions (US, China, etc.) are prohibited from participating.

I. Protocol Access & Infrastructure Setup

Amerox leverages account abstraction (MPC-based) to provide professional onboarding via secure social authentication (Google/Apple), maintaining user self-custody.

II. Strategic Tokenomics & Vesting

The AMX ecosystem features structured linear vesting to align long-term incentives.

Allocation	Percentage	Cliff/Vesting
Seed Round	10%	6mo Cliff, 18mo Linear
Strategic	15%	3mo Cliff, 12mo Linear
Public Sale	20%	10% TGE, 6mo Linear
Core Team	15%	12mo Cliff, 24mo Linear
Ecosystem	40%	Staged Release

III. AMX Utility & Ecosystem Drivers

- **Governance Rights:** Propose and vote on protocol evolution.
- **Fee Compression:** Tiered discounts on Swap/Futures/P2P.
- **Yield Optimization:** Real-yield USDC distribution for stakers.
- **Deflationary Burn:** Ongoing buy-back & burn from platform revenue.

IV. Institutional Risk Disclosure

- **Smart Contract Risk:** Audited but decentralized logic inherent risk.
- **Liquidity Risk:** Market depth impacts execution efficiency.
- **Regulatory Uncertainty:** Shifting global frameworks.

Empowering the future of institutional-grade DeFi. Amerox X.
